DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8, 10-26 and 53-63 are allowed over the prior art of record.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

While the closest prior art of record, (JP4062658367A Taketomi et al.), teaches ultra fine particles of YIG (yttrium iron garnet) on a glass substrate, the prior art fails to teach or suggest that the particles are embedded in the glass (in pores within the glass matrix). Other prior art of record, such as US Patent 6,150,027 (Yamamoto), teaches a sealing glass for bonding to a magnetic recording head which contains rare earth oxide crystalline particles have a particle size of 1-50nm (nanocrystals), and wherein the rare earth element is one of Sc, Y, PR, Sm, Eu, Gd, Tb, Dy, Tm, Yb, or Lu. This reference and the prior art taken as a whole fails to specifically teach or suggest that the nanoparticles are a rare earth iron garnet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
